

International Association of Hydrogeologists
Irish Group

Technical Discussion Meeting

Groundwater and nutrient dynamics in hydrogeologically heterogeneous catchments of Northeast Scotland and Ireland: initial groundwater conceptual models. Hamish Johnson, Jean-Christophe Comte (U Aberdeen), Ulrich Offerdinger (QUB), Rachel Cassidy (afbi), Mads Troldborg (The James Hutton Institute)

“Sulphur Slime Surprise” – a story of strange bacteria in a water well. George Reynolds (Metric Consulting)

Register in advance for this meeting. After registering, you will receive a confirmation email containing information about joining the meeting.

Date: Tuesday 7th December, 2021

Time: Talks & discussion 18:00 – 19:30

Bring your mince pie and mulled wine to your zoom

Future IAH Meetings

January 2022

Annual joint IAH-Geotechnical Society of Ireland lecture:

February 2022

Burdon Lecture – developing country hydrology and hydrogeology

March 2020

Early Career Hydrogeologists

International Association of Hydrogeologists

Irish Group

Speakers

	<p>Hamish Johnson: QUADRAT-DTP PhD student researching groundwater and nutrient dynamics in geologically heterogeneous agricultural river catchments. Twitter: @Hamish_Geosci</p>
	<p>George started his career in geophysics by winning the “Young Scientist of the Year” in 1968 for a project on the electrical characteristics of the Cloghleaigh iron mine in Co. Wicklow.</p> <p>He has degrees in geology and geophysics from TCD and an MBA from UCD. In 1988 he added a diploma in hydrogeology while convalidating his Trinity degree in Spain, with a little help from King Juan Carlos!</p> <p>He has over 45 years’ experience in mineral and groundwater geophysics in Ireland and throughout Europe, Mauritania and the Philippines, and now specialises in locating water wells for farmers using EM methods.</p>
